

RAIL

TABLES AND SMALL TABLES | Indoor
FEDERICO PERI

The low coffee tables from the Rail collection signed by Federico Peri exemplify a harmonious fusion between the natural beauty of the materials and Peri's sleek, sophisticated design. Perfect for the living room, study, or any living area, each coffee table features a top made of stone or wood strips, skilfully connected by satin brass ties. The legs, available in stone or wood, are connected to the top with satin brass junctions, ensuring both stability and a hint of elegance. This structure creates a refined play of material lines that emphasises the modularity of the top and the handwork behind every detail. Each coffee table is also distinguished by the natural veining and imperfections typical of marble, in a celebration of the raw material that enhances the authenticity of the natural world.

Plan / Surface: top made of 2 cm thick stone or wood strips, height 6 cm, connected by satin brass ties.

Feet / Legs: legs in stone with waterproof protective oil or in wood, connected to the top with satin brass junctions (see technical drawings).
