

Pathos 50

TABLES

2025

Antonio Citterio

Description

The load-bearing frame in laser-cut bronze and top in solid Italian walnut with untreated edges are the distinctive characteristics of the special edition of the Pathos table produced for Maxalto's 50th anniversary. These finishes add further elegance and sophistication to Pathos, designed by Antonio Citterio in 2011 and still today one of the great classics in the catalogue. Contrasting with the solemnity of the bronze, the nonconformist touch of the untreated edges fully embodies the Maxalto classic-contemporary style, its ability, that is, to constantly innovate, staying true to its identity but without fading into an repetitive sameness. Pathos 50 comes with a certificate guaranteeing its authenticity and uniqueness, signed by Antonio Citterio with the corresponding limited edition number.
