CHRISTOPHE DELCOURT

Beki is the sectional ottoman designed by Christophe Delcourt for Baxter, a piece of furniture with a sculptural and striking design that permits creative combinations and ever new informal uses. Each of the modules can be combined with other Beki ottomans using magnets, making this seat ideal for furnishing art galleries and installations. Like river stones with rounded, irregular corners, the ottoman's components adjust the space to create comfortable seating areas that invite socialising and relaxation, ensuring maximum comfort thanks to the leather upholstery.

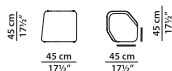

Model: modular article with elements joined using magnets. Modules can be purchasable separately or in compositions.

Structure: polimex frame with differentiated density polyurethane foam padding.

Available in soft leathers only.
